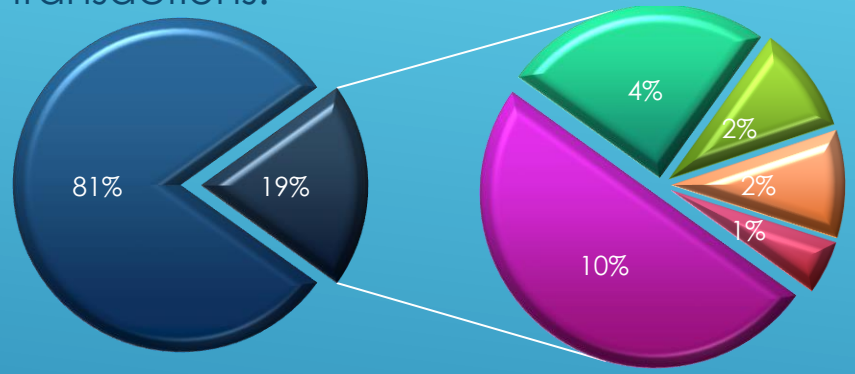
REWARD
POINT
burn with brain

What is RewardPoint?

RewardPoint is a community-driven project based on Binance Smart Chain #BSC. HODL brings the most revolutionary mechanism to the BSC ecosystem: Earn $BUSD by holding $RWP token. RewardPoint is designed to reward holders. It does this by applying a 19% tax on transactions:

- 10% is distributed among the holders as reflections
- 2% going to liquidity
- 4% going to the project
- 1% going to the team
- 2% going to marketing



We will burn, effectively removing tokens from circulation. There is no limit to the burn, the burn wallet will continue to grow, increasing the scarcity of RWP.

We do not burn your investment, we burn the incoming rewards which we take out of our project investment. This means that your money will never be burned and still still exists as a reinvestment in this project.

INTRODUCTION

REWARD POINT

We distribute the first project that does not burn your money.

Instead of just burning, we will reinvest the “project” money in many other reward projects. With the rewards received on the Project Wallet, we buy and burn $RWP.

The entire process is displayed/presented transparently on our website. You can track all transactions at any time.

A large pool of reward-token investments will balance itself and RWP will grow steadily. In the first months we will buy & burn 100% of the earned rewards. A small percentage will be taken for the liquidity on pancakeswap.

In Phase 4 we will create a voting system for further which will generate money for the project.

Our goal is a full burn wallet. We create a „red-flag“-system for a safe investment of new investors! We will publish more about this project in our news section.

HOW IT WORK‘S SAMPLE

THE WHOLE PROCESS IS TRANSPARENT

REWARD POINT

OUR WORK / YOUR BENEFIT

- We select, analyse and buy coins/tokens with rewards. Which we will buy & burn with the earned rewards $RWP.
- The RWP-chart will never stop moving because the daily reward incoming and steadily burn will kick in.
- You will receive the rewards on your wallet.
- To receive the rewards, you have to hold at least 50$ of RWP.
- In the long run **you can only win.**

REWARD POINT

Phase 1

- Start of development
- Create project/ go online
- Create whitepaper

Phase 2

- Pre-sale
- Dashboard v1.0
- First rewards are going to burn $RWP

Phase 3

- CMC and CG listings
- An aggressive marketing strategy is planned for a month

Phase 4

- Introduction of our voting system
- NFT launch
- First partnership
- Revision of our website

Phase 5

- Launch „red-flag“
- Listing on first exchange
- Huge marketing with red-flag
